

Pilot Plant Responsibilities and Use

I understand that I must schedule my use of space and equipment in the OSU Seafood Pilot Plant ahead of time with the OSU Seafood Lab pilot plant manager. Utilization of the pilot plant and the equipment in it will be kept track of using a calendar and I will be able to access this calendar electronically.

I understand training is required before I am permitted to use any of the equipment in the pilot plant. Training must be arranged with the OSU seafood lab pilot plant manager. Training includes not only how to operate the equipment, but how to properly clean it after operations are completed.

I understand that I must clean and sanitize all equipment (as required) and the floor area I utilized in the pilot facility each day as appropriate.

I understand and know where the designated storage areas for Sea Grant, OSU Extension and the OSU Seafood lab are in the Pilot Plant.

I understand that all storage of supplies and equipment is in designated areas in the pilot plant and all items should be returned to storage cleaned and sanitized (as appropriate) immediately after use.

I ACKNOWLEDGE I HAVE FULLY READ, UNDERSTOOD AND AGREE TO COMPLY WITH THESE INSTRUCTIONS:
